TAPE FACTS WORTH KNOWING

THE CHICAGO STEEL TAPE

Guarantee

If any tape of our make is not absolutely correct in its graduations or numbering, if it is indistinctly marked, if it breaks, due to a flaw in the steel or due to workmanship, we not only will, but particularly ask that we may, replace it with a new tape and pay transportation both ways.

If broken in any other manner, no matter how, and no part needs to be replaced, we will repair it and make it entirely serviceable without charge, but we cannot pay the transportation either way. Or we will send free, by mail, a Eureka Repairing Sleeve, if preferred. If part of the tape has to be replaced, we make a charge of 35c for the repair and 10c a foot for steel used. We will re-mark and re-number any of our bab-bitt-marked tapes for \$3.00 for a 100-foot tape or shorter, proportionately for longer. **The Chicago Steel Tape** is the only tape carrying any guarantee against breakage. **Long or narrow tapes** are more easily broken or kinked and should be much more carefully handled in use.

Repairs to Mine Tapes (Brass Sleeve) are 100% more than above.

THE CHICAGO STEEL TAPE

Tape Facts Worth Knowing

The standard tension adopted by the U. S. Bureau of Standards is 10 lbs. for tapes from 25 to 100 feet or from 10 to 30 meters in length and 20 lbs. for tapes longer than 100 feet or 30 meters.

CHICAGO Steel Tapes are correct when supported throughout, at a temperature of 68° F., with the above tension.

Coefficient for 1° F. change in temperature is 0.00000645.

100' Tape will expand or contract .0006' for each degree of temperature (F). A 100' CHICAGO Tape of nominal size 5/16"x0.015" will stretch approximately 0.0007 foot for a change in tension of one pound when supported throughout on a horizontal surface.

The "CHICAGO Steel Tape" in the hands of a good Chainman will last longer and stand more rough abuse than any other make.

With reasonable care it will give you the best service you ever received from any tape.

USER'S DUTY

Truth spreads by testimony. There is a sort of high compulsion, which lofty spirits recognize, to bear witness to the truth wherever found. That is how good standard merchandise gets world-wide distribution. A purchaser who has pleasure and satisfaction from the use of his tape spreads the news of his discovery to others whom he desires to enrich. If this tape pleases you, will you not tell about it to the most appreciative person you know?

CHICAGO STEEL TAPE COMPANY

Manufacturers of

Common Sense Things for Field Work

—o—
